Revolutionizing
Project Management

PMS Plus is an intelligent, interactive, web-based (cloud) project management platform that transforms how R&D projects and tasks are managed. Utilising the scientific method, PMS Plus focuses on metrics, ensuring teams quantify, measure, and track their progress toward clearly defined goals. This cutting-edge platform serves as a comprehensive tool for:

Planning: Streamline your project setup and execution.

Time Management: Save valuable time by improving task allocation and tracking.

Task Tracking: Monitor progress with measurable data on every project phase.

Workload Simplification: Reduce complexity and focus on impactful tasks.

Product Releases: Confidently manage product delivery timelines and resources.

World-Class Software Support: Ensure smooth project workflows that align with business objectives.

Empowering Teams with Metrics-Driven Insights

PMS Plus is designed to empower autonomous teams by providing contextual insights into their project's status. The platform features a dynamic dashboard that offers real-time access to key metrics, including:

Financial & Technical Data:
Understand project health from every angle.

Calendar & Timelines:
Stay organised with real-time scheduling tools.

Who Uses PMS Plus?

Product Management Teams: Plan, allocate resources, and budget effectively.

Project Management Teams: Track progress and align tasks to business goals.

Software Development Teams: Manage technical tasks with real-time updates and collaboration.

Agile Teams: Adjust priorities and track iteration progress efficiently.

Bug Tracking Teams: Identify issues quickly and address them within the workflow.

Resource Planning Teams: Allocate resources intelligently and manage workloads.

Budget Management Teams: Track expenses and ensure the project stays within budget.

Benefits of PMS Plus
